

There is a possibility of changing the 'Code' and/or 'Lot No.'

'Protein conc.' and 'Activity' might vary between lots.

Data sheet

Enzyme ; **β -Xylosidase YK1**

Code ; YYS-75-01

Lot No. ; 0-K901A

Protein conc. ; 1.1 mg/ml

Volume ; 1 ml

Form ; Dissolved in 20 mM sodium acetate (pH 6.0)

Storage ; -20 °C

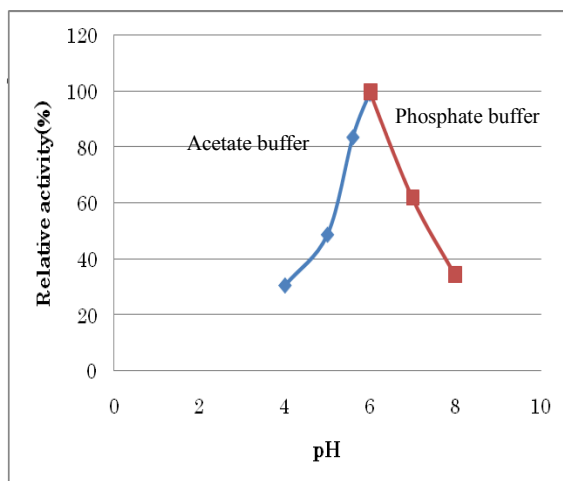

Activity ; 103 U/ml

Notes ; For research use only

Unit definition ...1 U is defined as the amount of enzyme producing 1 μ mol of p-nitrophenol per min from p-nitrophenyl-xylopyranoside (pNPX) in the assay condition (1 mM pNPX in 50 mM acetate buffer, pH 6.0).
